

APC SELECT — OWNER & COACH OPERATIONS GUIDE

Overview

The Select program now runs entirely inside the portal. This guide covers every step Mirko and the coaches need to operate it: activating billing, managing teams, scheduling practices and games, and tracking attendance.

Part 1 — One-Time Setup (Mirko only)

1.1 Create Stripe recurring prices

Before auto-renewal works, each billing tier needs a matching recurring Price in Stripe.

1. Go to **Stripe Dashboard** → **Products** → **Create product**
2. Name it `APC Select Membership`
3. Add a **recurring price** for each tier you want to offer:

TIER	BILLING INTERVAL	RECOMMENDED PRICE
Monthly	Every 1 month	\$100
Thirds	Every 4 months	TBD
Half	Every 3 months	TBD
Full Year	Every 12 months	TBD

1. Copy the `price_XXX` ID for each price you create.

1.2 Configure packages in the Owner Portal

1. Go to **Owner Portal** → **Packages**
2. Find (or create) a package for each billing tier you want to offer

3. For each one, click **Edit** and fill in:
4. **Package Type** → [APC Select Membership](#)
5. **Billing Tier** → match the tier (Monthly / Thirds / Half / Full Year)
6. **Stripe Price ID** → paste the [price_xxx](#) from Step 1.1
7. **Price** → the amount per payment
8. **Validity weeks** → how long one payment period covers (Monthly = 4, Thirds = 16, Half = 12, Full = 52)
9. Check **Active** and **Purchasable**
10. Save. Repeat for each tier.

Once Stripe Price IDs are saved, the **Join APC Select** button on the client Packages page will route through Stripe Subscriptions and auto-renew will be live.

1.3 Mark existing teams as Select teams

This should already be done automatically for the 2014, 2015, and 2016 teams. To verify or add a new team:

1. Go to **Owner Portal** → **Teams**
2. Edit the team → confirm **Is Select Team** is checked
3. For any future year group, create the team and check **Is Select Team**

1.4 Reassign old "APC select game" schedule blocks

Old workaround game blocks in the coach schedule need to be cleaned up:

1. Go to **Coach Portal** → **Schedule**
2. Select all blocks named "APC Select Game" (the old ones)
3. Use **Bulk Edit** → reassign their session type to **APC Select Practice**
4. Going forward, use the new **Select Games** section for actual games

Part 2 — Day-to-Day: Practices

Practices are created through the normal **Coach Portal** → **Schedule** flow — nothing changes there. The only difference is the session type.

Creating a Select practice block

1. Go to **Coach Portal** → **Schedule** → **Add Block** (or Bulk Add)
2. Set **Session Type** → [APC Select Practice](#)
3. Set **Select Team** → pick the specific team (2014, 2015, 2016) if this practice is team-specific.
Leave blank for an all-teams open session.
4. Set date, time, max participants, coach — save.

What happens automatically: - Only Select members on that team see the block in their booking calendar - All-team blocks (no Select Team set) are visible to all active Select members - Non-Select clients never see these blocks - The first 2 bookings per player per month auto-confirm at \$0 - A 3rd booking in the same month falls through to normal checkout (client uses a \$40 credit or program package)

Part 3 — Day-to-Day: Games

Games live in their own section, separate from the booking calendar.

3.1 Creating a game

Owner Portal → **Select Games** → **+ New Game** **Coach Portal** → **Select Games** → **+ New Game**

Fill in:

FIELD	NOTES
Team	Which team is playing (2014, 2015, or 2016)
Date	Game date
Start / End Time	End time is optional
Location	Full address or venue name
Coach	Assign a coach (optional)
Notes	Opponent name, field number, warm-up instructions, etc.

Save as **Draft** if you're not ready to notify players yet. The game is invisible to members until you publish.

3.2 Adding guest players

Before or after publishing, you can invite individual non-Select clients (e.g. a guest player Mirko wants to include):

1. Open the game detail page
2. Scroll to **Add Guest Invitee**
3. Search by client name → **Add**
4. If the game is already published, the guest receives an RSVP notification immediately

3.3 Publishing a game

When everything is set, click **Publish & Notify Team** on the game detail page.

What happens automatically: - Every active Select member on that team gets an in-app notification: "APC Select game on [date] at [location] — RSVP on your dashboard" - An [SelectGameRSVP](#) record is created for each member (status: No Response) - Members see the game on their dashboard with **Going / Can't Go** buttons - The game is safe to re-save or edit — publishing is idempotent, no duplicate notifications

3.4 Monitoring attendance

Open the game detail page at any time to see the live roster:

-  **Coming** — players who confirmed
-  **Not Coming** — players who declined
-  **No Response** — players who haven't responded yet

3.5 Game day digest

The morning before each published game (8 AM), the owner and assigning coach receive an email with the full attendance summary: confirmed list, not-coming list, and no-response count. No action needed — this fires automatically.

Part 4 — Select Membership Management

Viewing active members and credits

Owner Portal → Credits

The Credits page shows all active Select members, their credit balance, and when credits expire. From here you can:

- **Grant a manual credit** — select a client, enter amount and reason
- **Cancel a credit** — removes an available credit that hasn't been applied

Managing player team assignments

By default, players are matched to their Select team by birth year. To manually reassign or add a guest callup:

- **Owner Portal** → **Clients** → [client name] → **Players**
- Edit the player and set or change their **Team** field to the appropriate Select team
- For cross-team callups, use the **Select Teams** multi-select to add them as a guest on additional teams without changing their primary team

Adjusting session counts

If a player's monthly practice count needs a correction (e.g. a no-show that was marked confirmed):

Owner Portal → **Bookings** → find the booking → cancel it. The system handles the counter correctly — no manual adjustment needed.

Part 5 — Billing & Renewals

How auto-renewal works

Once Stripe Price IDs are configured (Part 1): 1. Client purchases a Select tier on the Packages page via Stripe subscription checkout 2. Stripe charges the card automatically each billing period 3. On successful charge: membership expiry extends by the correct interval, client gets an in-app confirmation 4. 7 days before renewal: client gets an advance notice notification 5. If payment fails: client gets an alert to update their card; Stripe retries automatically (3 attempts over ~4 days) 6. If cancelled: membership stays active until period end, then expires

Manual-pay members (no Stripe subscription)

Members who paid via one-time checkout (or were manually activated) get: - **30-day reminder** before expiry - **7-day reminder** before expiry

Both prompt them to renew via the Packages page.

Cancellation

Clients can cancel auto-renewal themselves: **Portal** → **Packages** → **Cancel auto-renewal**. This sets `cancel_at_period_end` in Stripe — they keep access until the end of the current period.

As the owner, you can also cancel or adjust packages directly from **Owner Portal** → **Clients** → **[client]** → **Packages**.

Part 6 — Quick Reference

Owner Portal navigation

SECTION	URL	PURPOSE
Select Games	<code>/owner-portal/select/games/</code>	Create, publish, view roster
Credits	<code>/owner-portal/credits/</code>	Grant credits, view Select member balances
Packages	<code>/owner-portal/packages/</code>	Configure billing tiers and Stripe Price IDs
Clients	<code>/owner-portal/clients/</code>	Manage player team assignments
Bookings	<code>/owner-portal/bookings/</code>	View and cancel any booking

Coach Portal navigation

SECTION	URL	PURPOSE
Select Games	<code>/coach-portal/select/games/</code>	Create and publish team games
Schedule	<code>/coach-portal/schedule/</code>	Add Select practice blocks

Checklist for each new Select member

- [] Player's birth year matches their team (auto-assigned on signup)
- [] Verify team shows on their dashboard after first login
- [] Confirm 6 × \$40 credits were seeded (visible in Owner Portal → Credits)
- [] If using auto-renewal, confirm `stripe_subscription_id` is set on their package

Checklist for each new season / year group

- [] Create team in Owner Portal → Teams with **Is Select Team** checked
- [] Create a billing tier Package with correct `stripe_price_id` and `billing_tier`
- [] Brief coaches: use `APC Select Practice` session type with the new team's **Select Team** field set
