

APC Select — Monthly Auto-Pay Feature

For Mirko's review before development begins.

What This Does

Instead of parents paying the full APC Select Membership price upfront, they can enroll in **monthly auto-pay**:

- Purchase the first month by **June 15th**
 - Automatically charged **\$100 on the 15th of each month** from July onward
 - The **12 sessions are valid for the entire membership term** — they don't reset each month; parents use them across the full season
-

How It Works for Parents

1. Parent logs into their APC account at `atletasperformancecenter.com`
 2. Goes to **Packages** → sees the APC Select Membership card
 3. Clicks **"Enroll in Auto-Pay"**
 4. Reads and agrees to the auto-pay disclaimer (required checkbox)
 5. Enters their card number — first payment of \$100 is charged immediately
 6. From then on, **\$100 is automatically charged on the 15th of each month**
 7. Sessions remain available throughout the term until all 12 are used
-

Auto-Pay Disclaimer (what parents will see and agree to)

Auto-Pay Agreement

By enrolling in APC Select Auto-Pay, you authorize Atletas Performance Center to charge your card **\$100 on the 15th of each month** for the duration of the membership term.

Cancellations must be requested directly from APC staff — you cannot cancel this from your account. Contact info@atletasperformancecenter.com to cancel.

Parent must check a box before they can submit.

How It Works for APC (Owner Side)

- The owner portal shows which clients have auto-pay active on their Select package
 - To cancel a client's auto-pay, the owner clicks "**Cancel Auto-Pay**" on the client's profile — this stops future charges immediately
 - When a payment processes on the 15th, the client's membership expiry automatically extends by one month
 - Sessions are NOT reset on renewal — they carry over for the full term
-

Questions for Mirko

1. **Term length** — How many months should the membership run? (e.g. June–November = 6 months, \$600 total)
2. **Price** — Is \$100/month correct, or will this vary?
3. **Start date** — Should the first billing be June 15th, or can parents enroll anytime?

4. **What happens if a payment fails?** — Should we automatically pause their booking access, or just notify you to handle it manually?
 5. **Cancellation policy** — If a parent cancels mid-term, do they keep their remaining sessions until the current month ends, or lose access immediately?
-

Timeline

Once Mirko approves the design and answers the questions above, development can begin. The core payment infrastructure is already in place — estimated 1–2 sessions to complete and test.
